Next Generation Laser Creates Porcelain Skin

Posted on April 20th, 2008 by Adrienne Papp

Our skin is subject to many kinds of abuse, including sunlight, pollutants, and day-to-day stress, sometimes resulting in an appearance that is rough, wrinkled, and prematurely aged.

Luckily we have world class treatments available to us that can reduce those detrimental effects and restore a fresh, youthful appearance. I can attest to the effectiveness of these rejuvenating effects myself. Even a little skin tightening and toning can make a big difference in your overall appearance!

The treatments offered by Dr. Robert Patrick Abergel can dramatically improve the look of your skin. Dr. Abergel, a Clinical Professor at the Keck School of Medicine at USC, is one of the true pioneers in cosmetic laser technology, with 20 years of experience and several U.S. patents to his credit. He has put his skills to use with a **new skin rejuvenation therapy that promises to put the "bloom of youth" back in your skin.**

Dr. Abergel's research and innovation means that the most sophisticated technology is always available to his patients. His latest breakthrough involving laser technology is the **new gold standard in skin rejuvenation.** With just one treatment you will see a dramatic difference!

"Unlike other procedures, our system using a Fractional CO₂ laser delivers stunning and durable results in just days." Dr. Abergel says. "I consider Fractional CO₂ laser one of the most important advances in the science of skin rejuvenation. It provides highly effective tissue rejuvenation, stimulates skin tightening and promotes long term collagen remodeling."

The advantages of this treatment are quickly evident. With a single treatment, the Fractional CO₂ treatment improves both fine lines and deep wrinkles, reduces discoloration and scars, tightens and completely refreshes your complexion. The most expensive skin creams in the world can't do as much as one of Dr. Abergel's laser therapies.

This dramatic improvement is also very easy on the patient. Using only a local anesthetic, you're free to drive after the simple 1-hour procedure. You also benefit from the extremely quick healing time, and can return to work in just days. And when you do return, be prepared for the compliments on your wonderful new look.

Dr. Abergel's treatment is also very affordable. With all the confidence that comes with beautiful skin, I was the first to give him a call for a complimentary evaluation. I just love to be in my skin these days.

One Response to "Next Generation Laser Creates Porcelain Skin"

Shi Geller, on April 20th, 2008 at 5:37 am Said:

I have a friend that had this procedure from this fabulous Doc....if I did not see it for myself, I am not sure I would have believed it...but she looks GLOWING and with skin texture that any woman would die for! He ranks up there with the very best, and as a prof at USC you can be sure you'd be in experienced hands!
