

LETTER OF RECOMMENDATION

December 15, 2006

To Whom It May Concern:

Adrienne Papp of the Atlantic United, Inc introduced and represented me, Laszlo Farkas , President of Energy Transport Technologies of Ojai, to the Los Angeles based Westside Today Media Group for generating an in-depth article in their six-city magazines about my breakthrough wireless energy transfer technology. The full-spread article appeared in the November 2006 issues of the Media Group for my full satisfaction.

Adrienne Papp was instrumental to guide me through numerous interviews, and helped me to describe my relatively complex technology in a clear, expressive way. The final article, structured and written by Adrienne, is now the best promotional presentation of our clean energy technology for transit and school buses. I have learned to appreciate the power of journalistic communication from Adrienne's relentless pursuit of simplicity and her use of evoking verbal imagery.

Adrienne Papp, in the course of preparing this article, has introduced me to LA Mayor, Antonio R. Villaraigosa, and California Governor, Arnold Schwarzenegger. She arranged these very valuable introductions within an astonishingly short time, enabling me to promote my clean energy technology in just the right political arena. The article in six magazines and the two introductions have been invaluable promotional tools for my business.

I find Adrienne's professional conduct impeccable and charming, as well as effective. Her style and appearance is decisive, right to the goal of getting the business done. Her service for promoting my clean energy and community ideas has been a success story, thanks to Adrienne Papp.

Laszlo Farkas
President, CEO
Energy Transport Technologies, Inc.
Ojai, California
